

INNOVA Series TV SAT / TV SAT FM OUTLETS

00/2005

GENERAL INSTRUCTIONS:

SAFETY INSTRUCTIONS:

- 1) For safety reasons, these products should be installed by an expert person and according to these instructions.
- 2) These products must be installed in enclosures where there are no products rated in excess of 50V.

INSTALLATION INSTRUCTIONS:

- 1) To avoid sharp bends and prevent crushing during the possible rotation of the unit the cable should be cut to an appropriate length.
- 2) To connect the TV cable follow the instructions below.
- 3) When the unit is wired push it carefully into the wall / mounting box . Check that the cable has not any sharp bends and is not trapped or pinched.
- 4) Fix the unit by using the fixing screws located on the back of the product. To not damage the plate or the screw / box threads do not over tighten the screws.

CHARACTERISTICS:

- 1) The outlets are fully screened and suitable for use in interactive and digital TV distribution systems and installations.
- 2) The signal quality depend on the accuracy of the wiring. To avoid that the inner insulation is crushed or squashed ensure that all cable bends are smooth.

TV/SAT/FM Frequency specification	
DIPLEXER	TRIPLEXER
TV: 5 - 860MHz	5 - 860MHz
SAT: DC-950-2400MHz	DC-950-2400MHz
FM: -	88-116MHz

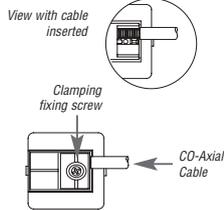

CABLE CONNECTION:

Strip the TV Co-Axial cable as shown. Do not exceed the stripping dimensions.

DIPLEXER AND TRIPLEXER MODULES:

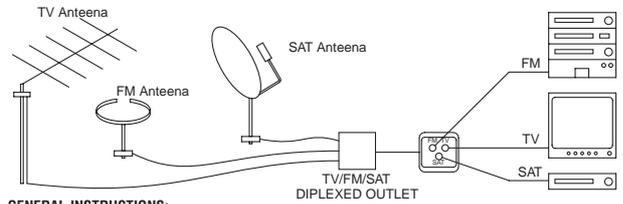

- 1) Open the cable clamp by unscrewing the fixing screw.
- 2) Insert the centre conductor of the coaxial cable in the apposite seat as shown. The terminal is screwless type.
- 3) Be sure that the screening braid is in the correct position. Check that there are no loose strands of braid: they could cause a short circuit with the centre conductor.
- 4) Close the cable clamp and tighten the fixing screw, without over tighten it.
- 5) Please leave this leaflet with the end user for future reference.
