ADVANCE 2 Series

MBOX Series

Please contact the SCAME offices for documentation, catalogue numbers, availability and prices.

NEW 2. MBOX 2 - 3 - 5 SERIES PANELS (EMPTY)

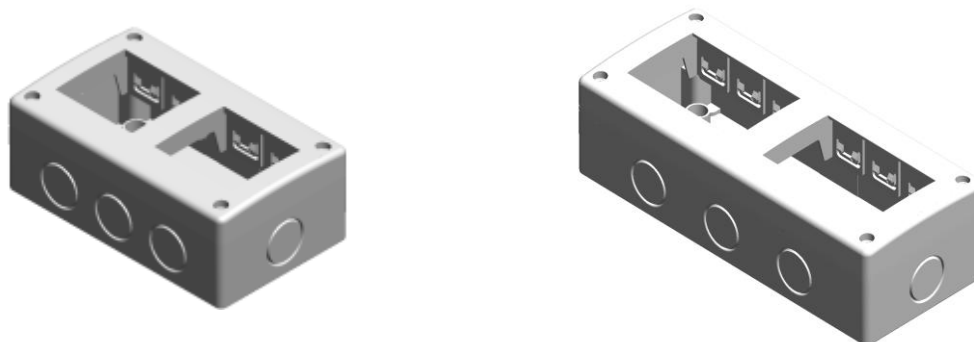

This product line has been expanded with an automatic device that guarantees illumination of the socket compartment and the control and protection equipment compartment when the outdoor lighting intensity drops. This allows identification and use of the product under poor lighting conditions, which makes it ideal for construction sites, campsites and parking areas.

The lighting of the compartments is guaranteed by a high-efficiency, low-consumption LED system. This system is managed by an electronic board connected to a sensor.

The product line is topped off with the wired MBOX 3-5 Night&day Series.

Please contact the SCAME offices for documentation, catalogue numbers, availability and prices.

NEW 3. UNIBOX: 4 AND 6 GANGS IP40

The Unibox product range with IP40 protection comes into line with that of IP55 protection. The two new versions for horizontal installation can house Evolution modules and, with the appropriate adapter included, Basic/8000 Series modules.

DESCRIPTION	PACK QUANTITY	CATALOGUE NUMBER
4-Module IP40 wall-mounted module container	1/24	136.4124
6-Module IP40 wall-mounted module container	1/16	136.4126

The technical features of the new products are consistent with those of the current production (1-2-3 modules).

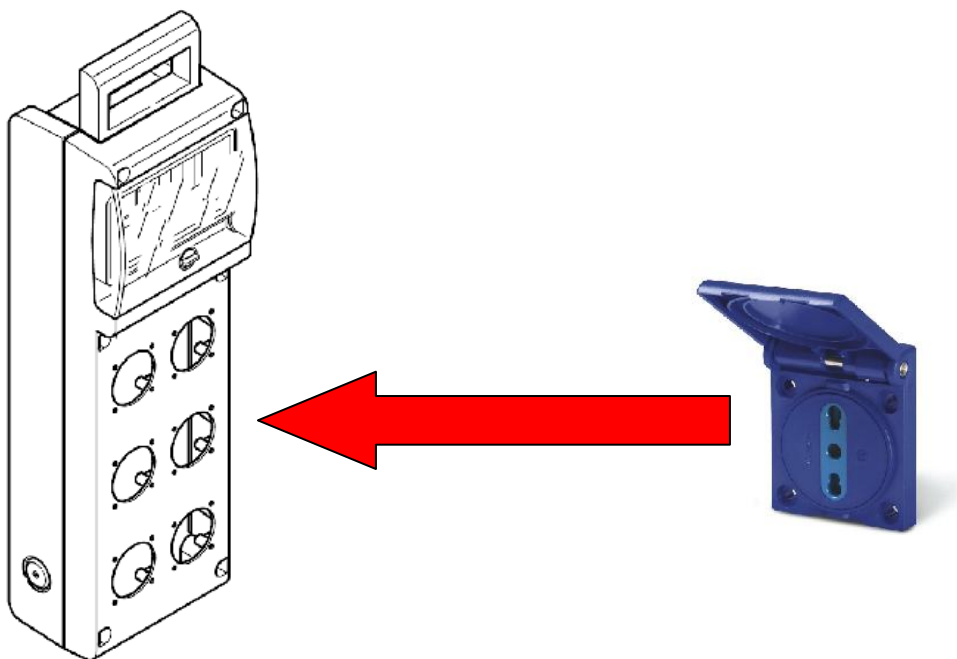

NEW

4. NEW VERSION OF THE BLOCK SERIES DISTRIBUTION PANEL

This product line has been expanded with the new empty version with predrilling for Standard domestic sockets with 50 x 60 flange (Domo Series, fam. 570). It is particularly suited for applications requiring domestic-type sockets.

The technical features of the new product are consistent with those of the current production.

Standards available for the sockets:

-  P11/P17 Italian standard socket 2P+E 16A – 250V
-  P30 Italian standard socket 2P+E 16A – 250V
-  German standard socket 2P+E 16A – 250V
-  French standard socket 2P+E 16A – 250V

DESCRIPTION	DIN MODULE	SOCKET PREDRILL.	DIMENSIONS	PACK QUANTITY	CATALOGUE NUMBER

NEW 5. >LUXURY< SERIES

A new brand is now rising on the world of the British standard wiring accessories.

Luxury identifies 5 different lines made of solid metal each one with a specific design:

- Classica with rope edges from finest heritage
- Moderna with plate rounded edged
- Moderna Screwless with a clip on fixing of the plate on the frame
- Piana with the thinnest plate
- Futura made of noble stainless steel with large rocker design.

Each range is available in different finishing mixable with 3 different colours of plastic frames as per the codifying system below:

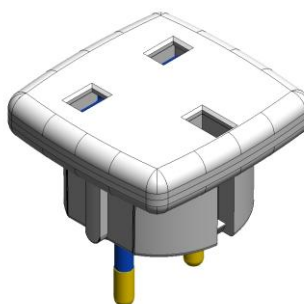

107.	AA	BBBB	CC	D
FAMILY CODE	LINE CODE	FUNCTION CODE	METAL PLATE/ROCKER FINISHING CODE	PLASTIC FRAME COLOR CODE
107. LUXURY series	CL – Classica MS – Moderna screwless MN – Moderna PI – Piana FT – Futura	3211 – Switch 10AX 1P... 3212 – Switch 20AX 1P... 3221 – Switch 10AX 2P... 3222 – Switch 20AX 2P... *	PB - Polished brass MB - Polished brass rope, mat brass plate SB - Satin brass PC - Polished chrome SC - Satin chrome PN - Polished black nickel AB - Antique brass	N – Brown B – Black W - White

12 years warranty give evidence to the quality of this new range, designed not only to be elegant and fine, but considering also the total safety of the end user.

Classica, Moderna, Moderna Screwless and Piana are already available in stock.

Futura line will be available on June 2009.
