LIBERA Series

• COMMUNICATION OF MODIFICATION

Scame Parre S.p.A. informs that, in order to standardize the wiring and to rationalize the test procedures, the socket-outlets with lock Type 3A (200.01663B), Type 3C (200.33263B), Type 2 (200.23264B) and Unel (200.4007B) have been modified.

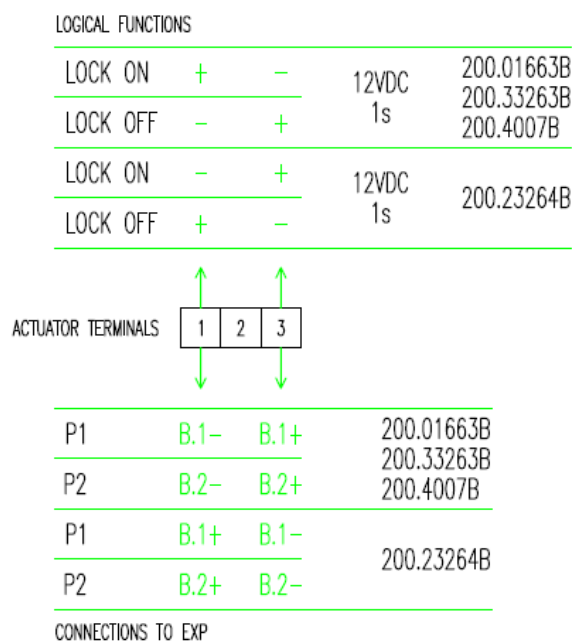

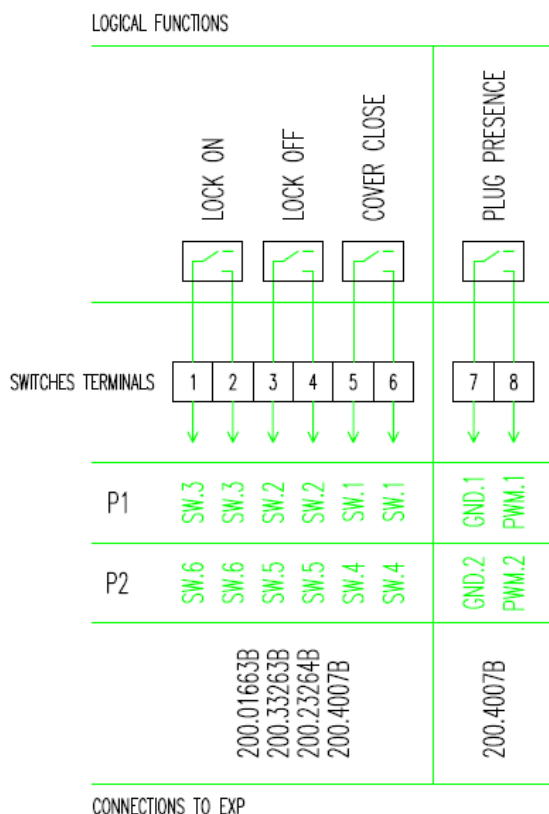

The modification consists in:

- Signal repositioning on the terminal strip as 200.23264B (see attached diagram).
- Switching from 0.75 to 0.5 mm² conductors for switch connections (0.75 mm² conductors will be used until exhaustion).

The modification doesn't affect the socket-outlet working, nor its management, that remains unchanged.

The modification will affect all the items produced from 05.05.2014 for which the instruction sheets will be updated to the new wiring.

The modification will not be retroactive therefore all the items in stock on that date will be provided, subject to availability, with the previous wiring.

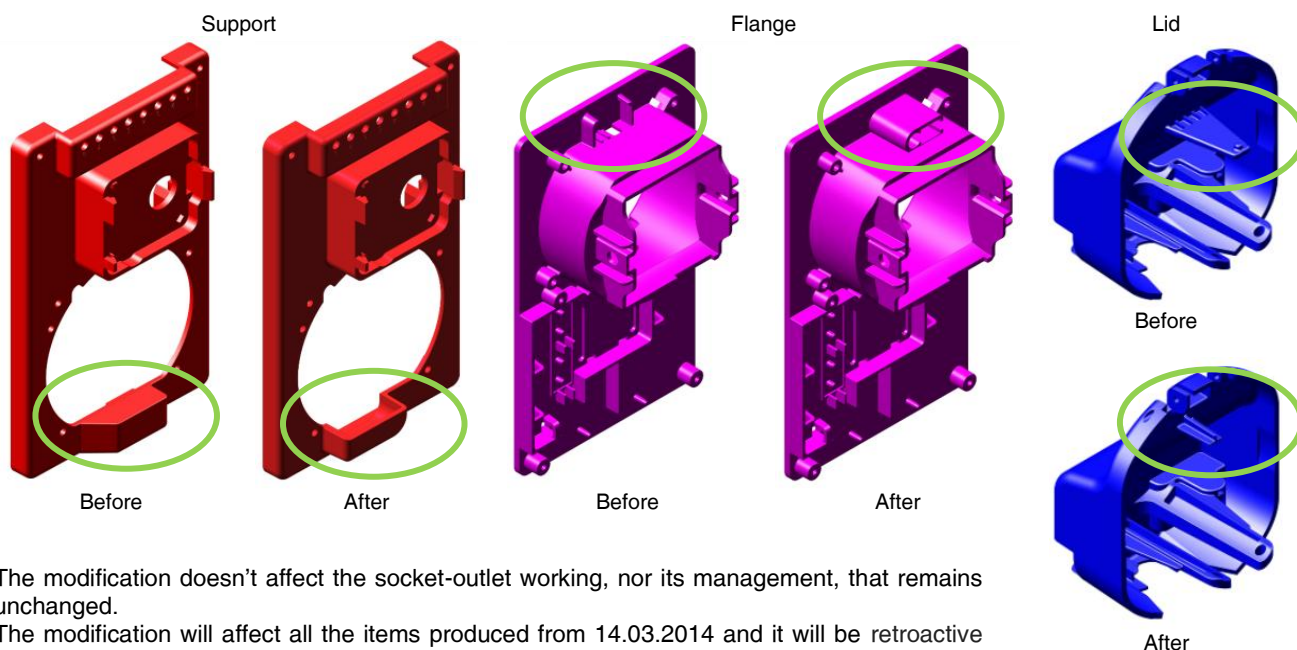

LIBERA Series

• COMMUNICATION OF MODIFICATION

Scame Parre S.p.A. informs that, in order to guarantee the interoperability with maximum number of Schuko plugs today on market, the UNEL socket-outlet with lock (200.4007B) has been modified. The modification consists in the resizing of the micro switch pushing flap placed on lid (that didn't allow the lid closing in case of angled plug) and consequent replacing of micro switch.

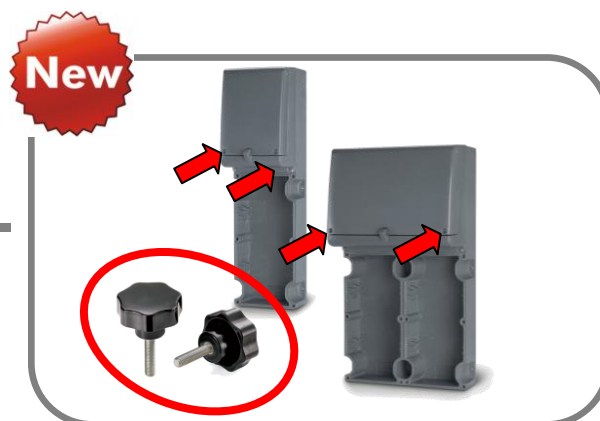

The modification doesn't affect the socket-outlet working, nor its management, that remains unchanged. The modification will affect all the items produced from 14.03.2014 and it will be retroactive therefore all the items in stock before this will be changed.

ADVANCE-GRP Series

- Doorlatch kit for easing closing of the door of ADVANCE-GRP consumer units

Couple of doorlatch for consumer units door Advance GRP series which provide the possibility to replace closing screw of Advance GRP consumer unit, removing the needed to use a screwdriver to open and close the door

Catalogue Number
579.0400

Description
Doorlatch kit for ADVANCE-GRP consumer units (couple)

ADVANCE-GRP Series

- Interlocked socket ADVANCE-GRP Series with MCB

New interlocked socket Advence GRP series with MCB switch directly operated from the handle.

In this new version the traditional switch disconnector is replaced by miniature circuit breaker (Eaton).

This feature allows to have magnetic thermal protection reducing the dimension of the product removing the needed of the consumer unit for the installation of the MCB.

Furthermore the switch can be operated directly by the handle, avoiding the opening of the cover of the socket or the door of the consumer unit. Equipped with a led for indicating operating of the switch and the presence of voltage downstream the switch.

The range cover sizes from 16 to 63A:

COMMAND Series

- New rated current 20A for box mounting versions

A new rated current has been added to the range of switch disconnectors Command series in order to equalize the range of Isolators.

With this addition for each size of enclosed switches Isolators series are available an equivalent size of switch disconnectors Command series.
