IN OVER FIFTY YEARS WE HAVE BUILT
AN INDUSTRIAL REALITY THAT HAS ALWAYS
MAINTAINED THE SPIRIT OF ITS ORIGINS.

SCAME PARRE S.p.A. is an Italian manufacturer of components and systems for low voltage electrical installations, in the residential and industrial fields.

Since 1963, the year it was founded, SCAME has grown to be an international group with a workforce of 650 employees at the three facilities located in the province of Bergamo, Italy, where the company's headquarter and main production lines have always been. The company also operates abroad, with 18 sales offices and branches, three of which are also production facilities.

In over 50 years of activity, it has kept its original spirit intact, spreading its values and distributing its products on the domestic market and, starting in the early 1970s, in over 80 foreign countries spread over 5 continents.

Who
WE ARE

OUR COMPANY IS MADE OF
PEOPLE, AND PEOPLE ARE THE
OUTCOME OF THE ENVIRONMENT
IN WHICH THEY LIVE.

SCAME having been founded and having grown in the High Seriana Valley, in the province of Bergamo, it has learned healthy values from the mountains that surround it, such as respect for the environment and for individuals, perseverance and solidity.

Above all, the mountains gave the company the gift of curiosity to reach the top in order to expand one's view on the world, fully aware that any horizon is more an opportunity than a limit.

Our
VALUES

WE ARE WHAT WE DO,
WE DO WHAT WE KNOW.

Over the years, SCAME has never stopped innovating its products and its processes. Not for the satisfaction of inventing that which does not exist at all costs, but because the balance between effort and result would actually be positive and lead to real advantages for everyone. So that innovation would result in progress.

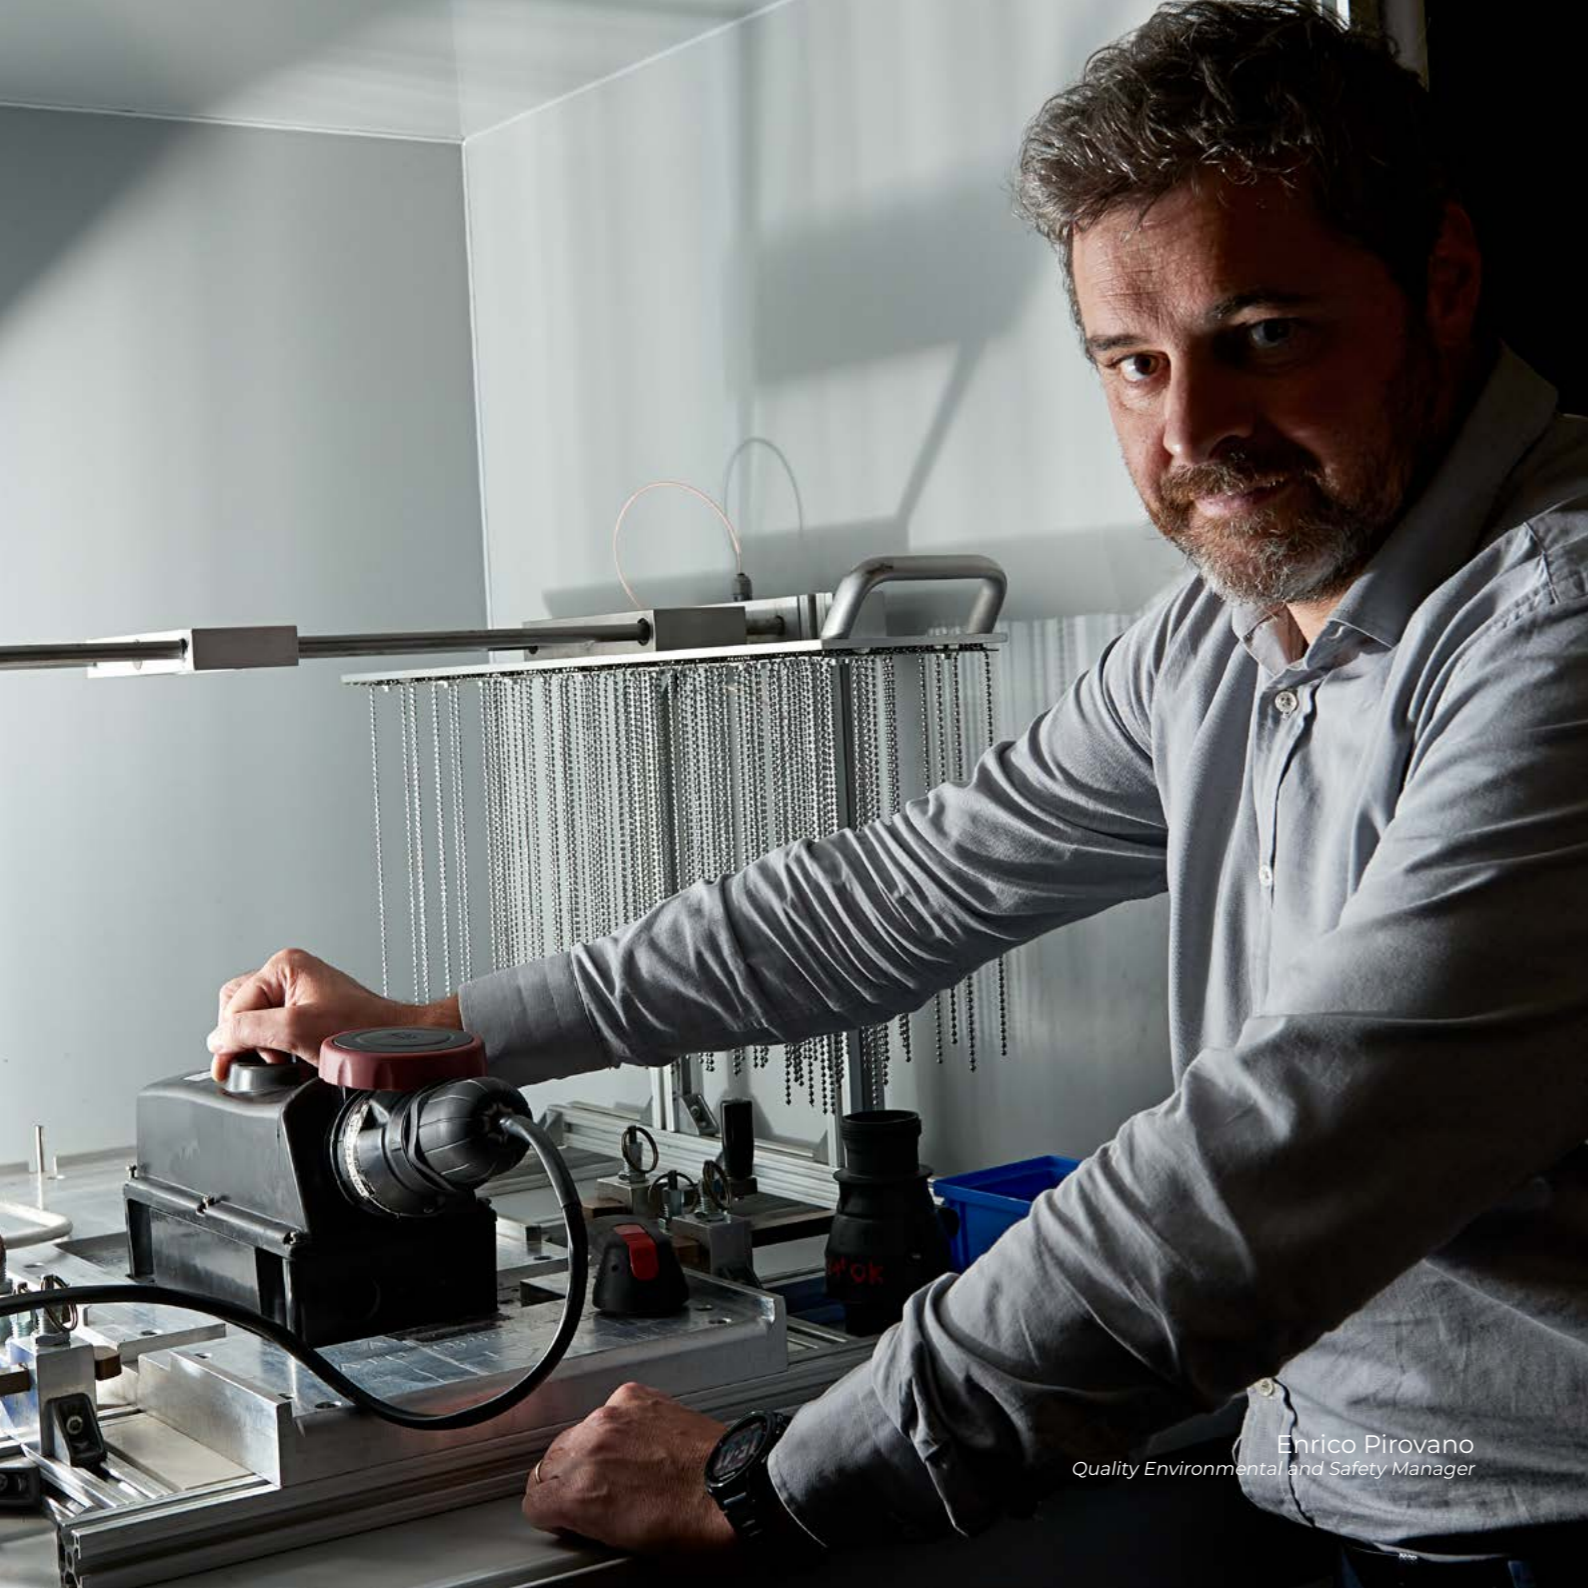

Our mission is to provide added value to the substance of our products, in order to make it easier to choose and install them, and to enhance the value of their users' daily gestures.

Our vocation is to cut down to a minimum the environmental impact of our processes, so that everyone can enjoy a liveable environment, the same environment we were lucky enough to enjoy.

Enrico Pirovano
Quality Environmental and Safety Manager

THERE CAN BE NO QUALITY IF DAILY ACTIONS ARE NOT CONSISTENT WITH THE VALUES THAT INSPIRED THEM.

The quality of our products, guaranteed in primis by the in-company laboratory certified WMT by IMQ, and the excellence of our company processes and their low environmental impact, are confirmed by the large number of international quality marks, by the ISO 9001 certification obtained way back in 1993 and by the ISO 14001 certification obtained in 2003.

Respect for our employees, who are people first of all, means guaranteeing them a suitable work environment, certified according to the standard ISO 45001.

Our
COMMITMENT

E-MOBILITY

DOMESTIC

SERVICES

INDUSTRY

HAZARDOUS AREAS

ONLY OUR CUSTOMERS KNOW
THEIR REAL NEEDS,
OUR JOB IS TO UNDERSTAND AND MEET THEM.

Through our 20,000 catalogue products or by developing new ones. We started out with a simple product, simple like the idea that conceived it: an insulated nail used to secure cables to a wall. In 1984, when we invented the first single-piece system adapter, the industrial and domestic worlds met with levels of convenience and safety that had been unknown until then. Since then, we have developed both universes, with special focus on IEC and UL connectors and energy distribution systems for the worksite, tertiary and industrial sectors, with solutions specifically designed for harsh environments. The range of ATEX-IECEX products, certified by leading international laboratories, made it possible for us to also offer safe and innovative solutions for hazardous areas, thus completing our range of special products intended for the industrial sector.

Our
SOLUTIONS

WE PREFER TO DESCRIBE OUR
DREAMS WITH FACTS,
RATHER THAN WITH WORDS.

We believe in the idea of world tailor-made to man, and consider sustainable mobility a way to achieve such a world, through respect for the environment.

We believed in this idea back in 1999 when, together with CEI-CIVES*, we designed and developed the first connector specifically intended for charging electric vehicles.

We believe in this idea today, with a company division dedicated to research and development of smart charging systems, to which we allocate a meaningful share of our total R&D budget.

We believe in it to the point of having made electric vehicles the mainstay of our company fleet.

**(Italian Committee for battery, hybrid and fuel cell electric road vehicles)*

Our
BELIEF

Giampietro Camilli
R&D Manager

WE CANNOT PREDICT THE FUTURE,
BUT WE DO EQUIP OURSELVES TO FACE IT,
WHATEVER CHALLENGE IT THROWS AT US,
FULLY AWARE THAT TODAY
IS ALREADY YESTERDAY'S FUTURE.

By constantly updating our production processes, increasingly efficient, automated and integrated, but more and more dependent upon human skills, which represent a crucial asset for SCAME.

By investing in continuous training and in always new professional figures, because there cannot be a "smart factory" without "smart people".

By improving our products, which apparently cannot be improved further, providing them with the intelligence needed to make them the link between man and machine, as requested by the Industry 4.0.

By taking advantage of new technologies in order to reach directly those who use our products, informing them and being informed by them of their needs.

Because, today as yesterday, connecting is what we know how to do best.
Whether it is distributing energy, or solid values.

Staring at the
FUTURE

FSC® is an internationally recognised certification system that guarantees correct forest management and the traceability of primary materials and derived products. The FSC® logo guarantees not only that the printed product was made with paper obtained through correctly managed forests, but also in compliance with the principle of the Chain of Custody of the supply chain.
